

ROOFING SELECTION GUIDE

Luxury, Designer
& Traditional
Roofing Shingles

CertainTeed
SAINT-GOBAIN

You know it when you see it.

It's not just a roof.
It's a CertainTeed roof.

Quality. Durability. Style. Color.

When you select a roof for your home, there's a lot to consider.

That's when a roof becomes more than just a roof. The same way a home is more than just a house.

You want the best for your home and everything in it.

So why guess,
when you can be **Certain?**

available. CertainTeed starter and CertainTeed hip and ridge required. *** With approved underlayment

High-Performance Starter

Starter Course shingle specifically for use with Grand Manor and Highland Slate—and the only approved installation alternative to using the shingles themselves.

- 10" x 36", 102 lineal ft. per bundle, 34 shingles per bundle
- Provides labor and cost savings by not cutting shingles
- Dual sealant strip for increased wind resistance
- Better look with straight factory-cut eave edge

Presidential Starter

Required for Presidential Shake TL and Presidential Shake applications.

- 13 1/4" x 40" (required double layer), 36.5 lineal ft. per bundle (based on 2-layer application), 22 shingles per bundle.
- Two layers of straight factory-cut eave edge
- Available in the entire Presidential Shake TL and Presidential Shake color line
- Assures Class A fire rating
- Saves significant installation time

CertainTeed Swiftstart®

CertainTeed Swiftstart metric starter shingle is designed specifically for use with CertainTeed Landmark Series shingles. Rather than cutting expensive field shingles to use as starters, you can save time and money by starting with Swiftstart.

StreakFighter® algae-resistance protection

StreakFighter is a special feature that protects a wide range of CertainTeed shingles from the streaking, spotting and discoloration caused by airborne algae. It helps safeguard a roof's beauty, especially in humid areas.

SureStart™ protection

Because CertainTeed roofing products are manufactured to the highest quality standards, we confidently include the additional assurance of SureStart™ protection with all CertainTeed shingles. SureStart provides the strongest protection you can get in the vital early years after your new roof has been installed.

Simply put, if a manufacturing defect is discovered during the SureStart period, CertainTeed will provide reimbursement of 100% of the cost of the shingles and labor to repair the defective shingles or apply new shingles to replace the defective shingles. See actual warranty for details and limitations.

Roofers' Select®

This revolutionary high-performance underlayment combines new technology with the best attributes of true 15 and 30 lb. felt.

- Lays flat and is extremely resistant to wrinkling
- Reduces the likelihood of slipping for increased safety
- Doesn't tear away from fasteners when walked on or in strong wind
- Meets underlayment requirements for the CertainTeed Integrity Roof System™

DiamondDeck®

DiamondDeck is a synthetic, scrim-reinforced, water-resistant underlayment that can be used beneath shingle, shake, metal, or slate roofing. It is manufactured to provide best-in-class performance in terms of both weather protection and contractor safety. 10-square roll (4-foot wide and 250-foot long) is easier to handle and faster to apply than standard felt rolls.

WinterGuard®

When snow and ice melt, trapped water can infiltrate to damage the roof deck and building interior.

WinterGuard is installed under shingled roofing to prevent water damage from ice dams, as well as wind-driven rain.

WinterGuard is designed for use on roof decks as a waterproofing underlayment beneath shingle, slate and tile roofs to prevent leakage due to water backup from ice dams or wind-driven rain. WinterGuard HT, an advanced waterproofing underlayment, is specially formulated to resist high roof temperatures and is the only WinterGuard product to be warranted for use under metal roofs. WinterGuard is most commonly used in critical areas such as roof eaves, valleys and low-slope applications.

For specific details and limitations, refer to the actual product warranties.

RoofRunner™

Lightweight synthetic polymer-based underlayment outperforms felt and outclasses other synthetics. Designed for use on roof decks as a water-resistant layer beneath asphalt roofing shingles, this scrim-reinforced underlayment includes a special top surface treatment that provides excellent slip resistance, even when wet. Large roll size - 4ft wide x 250 ft long - speeds application.

MetaLayment® Self-Adhering Metal Underlayment

MetaLayment has a tough, tear-resistant film on its top surface that will not scratch roofing metal applied over it. The adhesive bottom surface of MetaLayment is protected with a disposable silicone-coated release film, which is split longitudinally down the middle for easier application. Manufactured to meet ASTM D1970.

Color Companion Products™ for Flat Roof Areas

With CertainTeed Flintlastic® SA, you can coordinate flat roof areas like carports, canopies and porches with your main roof. Flintlastic SA is a self-adhering low slope roofing product available in eight colors that complement some of the most popular CertainTeed shingles.
